

Wild Pollinator Count Tally Sheet

You can print these pages and use them to record your observations.

Afterwards, please submit your data online at <http://wildpollinatorcount.wordpress.com/submit-observations/>

Date and time of this observation. * N.B. Time that you started the observation.

Date: _____ Time: _____

The location of your observation. *

If you can't/don't want to give an exact street address, type a street name, place name or description (e.g. council park at the end of Smith St)

The name (common or scientific) of the plant you observed and the details of your observation site (e.g. quantity of flowers observed, moving/stationary etc.) * E.g. Queensland silver wattle: stationary 30 x 30 cm window of flowers; Magnolia tree: 1 flower; Apple tree: moving observation of whole tree

If you saw an insect you can't name, please describe it here and tell us how many you saw.

Add any other details about your observations. If you recognised different species/family groups, please give an abundance breakdown for the categories above, or any other wild pollinator category not listed. Be as detailed as you can.

Reminder - you will also be able to add photo files to your online submission.

This is the first Wild Pollinator Count and we want to know how we can improve for next time.

If you would like to receive updates on the Wild Pollinator Count, please include your email address in the online form.
